

FIG. 1

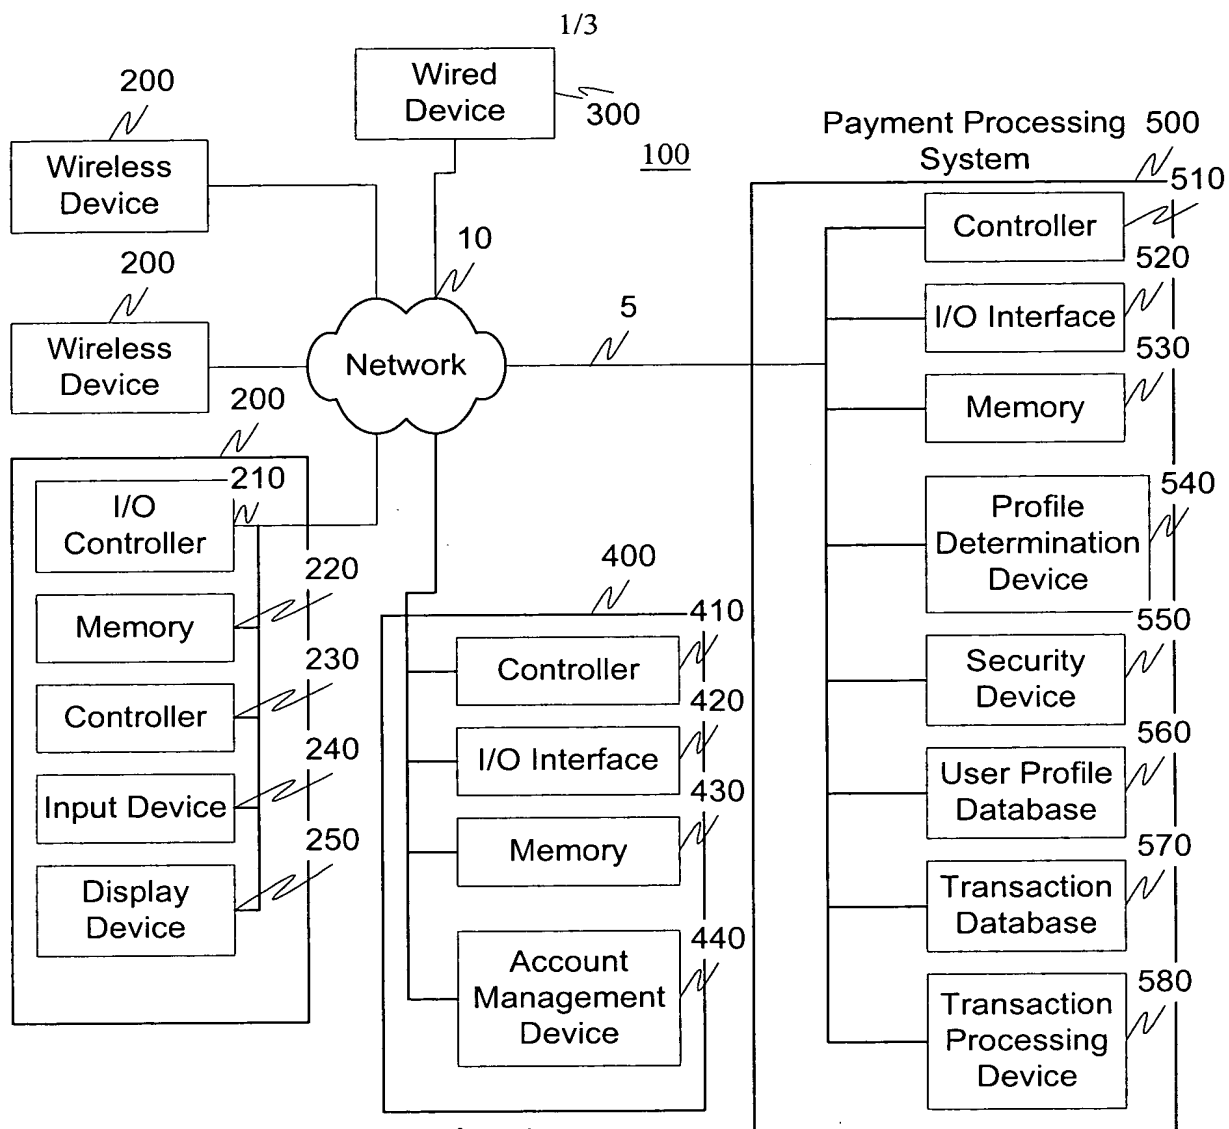

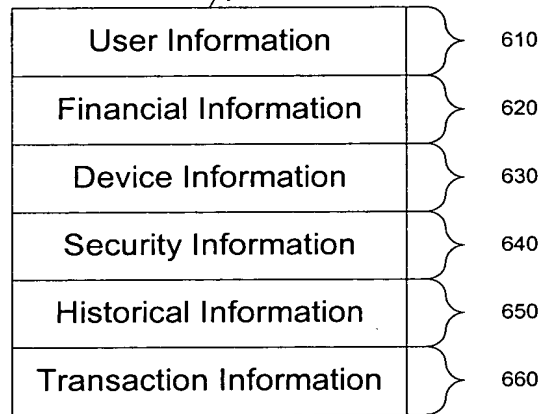

Fig. 1

600

The diagram shows a database structure labeled 600, which is a vertical stack of six rectangular boxes. Each box contains a type of information, and each box is connected to a bracket on its right side, which is then linked to a numerical label. A squiggly line points from the label 600 to the top of the stack.

|                         |     |
|-------------------------|-----|
| User Information        | 610 |
| Financial Information   | 620 |
| Device Information      | 630 |
| Security Information    | 640 |
| Historical Information  | 650 |
| Transaction Information | 660 |
